Novelty (PCT Article 33(2))

The present invention relates to a double-twist spiral wire for a gabion unit, characterized in that two vertical wires are spirally rotated in an opposite direction to each other, twisting around one horizontal wire, thereby producing a wire having double-twist structure.

The subject matter of the present application is different from that of D1-D4. Thus, the subject matter of claims 1-6 seems to be novel.

Inventive Step (PCT Article 33(3))

None of D1-D4 teach or fairly suggest the subject matter of the present application. Thus, the subject matter of claims 1-6 seems to involve an inventive step.
